

# Task for Frontend Developer

**Part 1:** Check the screenshot URL (<https://prnt.sc/fURogFuEfvMk>). You need to develop the design of the given screenshot.

**Case 1:** The view must be a single page with horizontal scrollbar.

**Case 2:** The cards must be scrollable according to their parent cards.

**Part 2:** Check the screenshot again (<https://prnt.sc/367D677et8oT>).

**Case 1:** You need to pick the attachment and call a modal with JavaScript.

**Case 2:** Upload multiple attachments and show a list view with the original files also the extension name of the files.

**Part 3:** You need to make an Api to upload the files in databases. And count the attachments like this (<https://prnt.sc/RRB15GGbb7IT>).

Requirements: Complete the task using ReactJs. You can use Laravel/PHP or NodeJS for storing data.

## Submission:

- The deadline is 24 hours. If you need more time, let me know.
- Please upload the resources on GitHub and provide us with the link.
- Kindly share the live link for the task, too.
- If you have any questions, call **01973132603**.
